

Engage Your Child with Diverse Content to Help Them *Go Beyond* Expectations

Actively Learn Transforms the Way Your Child Accesses Grade-Level Content

Actively Learn is a powerful digital learning platform that engages every student in grades 3-12 with relevant ELA, science, and social studies lessons. Educators access a vast catalog of diverse, grade-level content with embedded student supports to drive critical thinking and peer collaboration. Key features include:

- *Compelling, standards-aligned assignments connected to core courses*
- *Built-in scaffolds and immediate feedback to promote your child's success*
- *Student-driven reading tools, including text-to-speech and annotations*
- *A learning approach that makes it easy to access grade-level content*
- *Rich data to measure your child's progress across standards in real time*

High-Quality Instruction and Differentiation

Essential questions invite curiosity; scaffolding notes and media provide context, spur insight, and prompt your child to think deeply. Extra Help scaffolds and extension activities help teachers meet students where they are to maximize learning.

Student Supports

- Hear, define, and translate text into 100+ languages
- Annotate and share notes
- Request real-time revisions
- Customize text settings (for readability)

Teacher Supports

Teachers can customize the assignments to meet the needs of the class, while making critical connections to all subject areas.

“

Actively Learn has been life-changing for me and my students. I so appreciate the ability to see exactly what students are saying about a text and being able to provide feedback right there in the moment.”

Laura Deal, ELA Teacher

Real-Time Data to Drive Instruction

Rich student data enables educators and administrators to discover learning gaps and track your child's progress over time. Educators can then address gaps by assigning texts that support your child's mastery of state standards.

“ Actively Learn made it so much easier for me to see where my students were struggling.”

Stacy Walker, Social Studies Teacher

Educators can focus on areas where your child is struggling to inform just-in-time teaching decisions as well as future lessons. Reports measure your child's activities, learning, and growth, including:

- Reading time
- Questions answered
- Notes taken
- Words defined and translated, and much more

Standards and Recommendations

Educators can not only identify your child's performance on state standards, but they can also identify ways to encourage your child to spend more focused time on assignments, recommend opportunities for additional writing practice, encourage your child to use annotations more purposefully, and more.

Teachers: *Actively Learn's* data and recommendations help teachers forge an effective teaching path to drive your child's learning.

Students: Your child will thrive when their learning is personalized. They can monitor their progress, which promotes self-efficacy.

LOG IN WITH YOUR CHILD NOW!

“ For my tiered students and others struggling, I have assigned Extra Help in the questions such as hints [and] writing templates to help them organize responses, and this has led to measurable results.”

Sara Layton, ELA Teacher
